Elegance and confort

The interiors arrangements would satisfy the most advised sailors with a full and spacious navigation area, easy circulation, a kitchen with a large work surface and lots of storage space. The cabins are spacious, well ventilated and offer all the confort on board. The decoration is neat and luxurious with warm tones, high-end materials carefully made. The Aventura 34 will be your perfect companion for your future cruises and explorations.

Modern, Luxurious and Performance

Our new A34 will take in the catamaran range a special place thanks to its design and the preliminary study that was carried out by the couple of our STGI / Aventura shipyard and Samer Laster architect.

Designed for performance, with low draft and exact width to explore new areas, the lines are resolutely fluid and tight with important glass surfaces openings and amenities that give pride of place to space and confort
